Program Guidance

(HIV/AIDS Bureau Policy Clarification Notice #16-02, Revised 10/22/2018)

The elements of EIS often overlap with other service category descriptions; however, EIS is the combination of such services rather than a stand-alone service. HRSA RWHAP Part A recipients should be aware of programmatic expectations that stipulate the allocation of funds into specific service categories.

- HRSA RWHAP Parts A and B EIS services must include the following four components:
 - Targeted HIV testing to help the unaware learn of their HIV status and receive referral to HIV care and treatment services if found to be living with HIV
 - Recipients must coordinate these testing services with other HIV prevention and testing programs to avoid duplication of efforts
 - HIV testing paid for by EIS cannot supplant testing efforts paid for by other sources
 - Referral services to improve HIV care and treatment services at key points of entry
 - Access and linkage to HIV care and treatment services such as HIV Outpatient/Ambulatory
 Health Services, Medical Case Management, and Substance Abuse Care
 - o Outreach Services and Health Education/Risk Reduction related to HIV diagnosis
- HRSA RWHAP Part C EIS services must include the following four components:
 - Counseling individuals with respect to HIV
 - High risk targeted HIV testing (confirmation and diagnosis of the extent of immune deficiency)
 - Recipients must coordinate these testing services under HRSA RWHAP Part C EIS with other HIV prevention and testing programs to avoid duplication of efforts
 - The HIV testing services supported by HRSA RWHAP Part C EIS funds cannot supplant testing efforts covered by other sources
 - Referral and linkage to care of PLWH to Outpatient/Ambulatory Health Services, Medical Case Management, Substance Abuse Care, and other services as part of a comprehensive care system including a system for tracking and monitoring referrals
 - Other clinical and diagnostic services related to HIV diagnosis
